PERSONAL SUMMARY

Background in Electrical Engineering with multidisciplinary hands-on experience spanning telecommunications, network operations, electrical systems, and instrumentation. Experienced in DWDM/ASON transmission networks, MPLS, GPON, optical fault isolation, and multi-vendor network troubleshooting. Complementary technical experience in Python, Linux, NVIDIA CUDA, OpenCV, and computer vision, with hands-on involvement in real-time image processing, performance optimization, and engineering system integration.

EDUCATION

Universitas Trisakti

Bachelor of Electrical Engineering (S.T.)

2021 – 2025

- GPA: 3.13 / 4.00
- Final Assignment: Design of a BTS Shelter Security System Based on Pretrained CNN Face Recognition with NVIDIA CUDA Optimization Integrated with the MQTT Protocol
- Capstone Project: Design and Implementation of an IoT-Based Fire Suppression System Using Temperature and Smoke Sensors with Sprinkler Integration

Politeknik Negeri Padang

Diploma in Electronics Engineering (A.Md.)

2013 – 2016

- GPA: 3.23 / 4.00
- Final Assignment: Design and Development of a Fire Suppression System with SMS Notification Using GSM Shield

ACADEMIC HIGHLIGHTS

Final Assignment Exhibition & Demonstration | 2025

- Selected to demonstrate the Final Assignment: Design of a BTS Shelter Security System Based on Pretrained CNN Face Recognition with NVIDIA CUDA Optimization Integrated with the MQTT Protocol at an academic exhibition organized by the Department of Electrical Engineering, Universitas Trisakti, for new students and their parents. The demonstration covered NVIDIA CUDA acceleration on the RTX 2060, MQTT communication, MediaPipe-based anti-spoofing, and the operation of the integrated BTS shelter security system.

CORE COMPETENCIES

- Telecommunications: DWDM • ASON • OTN • MPLS • GPON • Metro Ethernet • VSAT • Radio Link • Fiber Optic
- Network Engineering: TCP/IP • Routing & Switching • VLAN • Bandwidth Management • Optical Analysis • Fault Isolation
- Electrical & Instrumentation: Power Distribution • Three-Phase Systems • Testing & Commissioning • Sensor Interfacing • Industrial Automation
- Programming & Computer Vision: Python • Linux • NVIDIA CUDA • OpenCV • MediaPipe • Machine Learning • Deep Learning

WORK EXPERIENCE

iForte Solusi Infotek

DWDM Analyst

Oct 2023 – Present

- Analyzed optical power budgets, OSNR levels, and spectrum allocation across Huawei, ZTE, and Infinera DWDM networks to mitigate signal degradation.
- Executed complex wavelength routing and channel provisioning across ASON topologies, ensuring core availability and zero SLA breaches.
- Handled diagnosis for optical anomalies and escalated unresolved high-impact incidents to DWDM Engineers and Vendor TAC to minimize MTTR.

DWDM Dispatcher

Oct 2021 – Oct 2023

- Monitored optical power levels and spectrum performance across Huawei, ZTE, and Infinera DWDM networks via NMS platforms to flag anomalies.
- Executed rapid first-level troubleshooting, wavelength tracing, and incident dispatching for transponder and optical power errors.

Lintas Media Danawa

Junior Network Engineer

Jun 2019 - Oct 2021

- Provisioned and managed MPLS Label Switched Paths (LSPs) across backbone infrastructure to guarantee optimal traffic forwarding, load balancing, and high service availability.
- Performed end-to-end customer service path tracing and fault isolation across MPLS, DWDM, GPON, and Radio Link networks, ensuring rapid resolution of connectivity degradation.
- Provisioned and managed customer bandwidth profiles on routers in strict accordance with service-level agreements (SLAs).

Nindya Karya

Mechanical Electrical Engineer (Project-Based Contract)

Jun 2017 - Sep 2017

- Participated in the construction, installation, testing, and commissioning of critical M&E infrastructure for the Air Traffic Control (ATC) Tower, adhering strictly to aviation safety standards.
- Managed low-to-medium voltage electrical power distribution systems (MDP/SDP), maintaining continuous and reliable power supply for critical facility operations.
- Executed comprehensive insulation resistance testing, commissioning, and three-phase load balancing to ensure electrical system safety and operational readiness.

PROFESSIONAL DEVELOPMENT

- Cultural Heritage & Responsible Artificial Intelligence - Universitas Trisakti | 2026
- Face Biometrics Technology in the Era of Artificial Intelligence (AI) and Cyber Security - National Research and Innovation Agency (BRIN) | 2026
- ZTE OTN Product Operation and Maintenance Training - ZTE Corporation | 2024
- Infinera 7300 Field Engineering Training - Infinera | 2022
- Raisecom GPON Introduction Training - Raisecom | 2021
- Hughes JUPITER System Training (EchoStar Company) - Hughes, an EchoStar Company | 2019
- Technical Training – Hughes Network Systems - Hughes Network Systems | 2018

LANGUAGES

English: Professional Working Proficiency

English Language Test (ELT) - Universitas Padjadjaran (TOEFL-like)
